

# One-stop Fastener Manufacturer & Trader in Zhejiang China Jingle-Tech Fasteners Co., Ltd.

by Dean Tseng, Fastener World

## Dual Strengths: Manufacturer & Trading

Jingle-Tech Fasteners in Ningbo City is a fastener trader plus manufacturer with a factory and export office, supplying to the industrial sector and construction industry. “Many overseas clients demand more and more complex types of fasteners. We hope to provide better one-stop service to help our customers quickly and conveniently purchase high quality products at lower prices, and that’s where we began to combine both our strengths in fastener manufacture and trading,” said General Manager Candy Wang in an interview with Fastener World. 20 years have past since the company was founded in 2007, now with footprints across northern and southern America as well as Europe. Besides having plenty of partners in its own supply chain, Jingle-Tech Fasteners provides various products including Fasteners, Stamping Parts and OEM CNC Machinery Special Parts and peripheral construction products in materials including carbon steel, stainless steel, alloy steel, brass and nylon to satisfy various customer demands.

Certified to ISO9001, Jingle-Tech Fasteners puts “6S” quality management methodology in force, namely Sort, Set in order, Shine (cleanup), Standardize, Sustain, and Safety for guaranteed quality. The company is stretching from standard fasteners to non-standard fasteners and peripheral products as detailed in the following categories:

### Non-standard fasteners:

Production as per customers’ drawings. Available in all types of electroplating and materials on request.

### Precision machinery components :

Also manufactured as per customers’ drawings. Compliant to higher requirements on tolerances and machine performance.

### Precast construction accessories:

 With CE approved quality.

### Fastener accessories for the mining industry:

 Offering quality-assured safety.

The manufacturing process complies with IFI, DIN, BS, ISO, JIS, and AS standards. The company also has a specialized technical division to provide customers with customized product drawings and 3D drawings for prior confirmation.

## Glancing the World Market from China’s City of Fasteners

The City of Ningbo where Jingle-Tech Fasteners stands is the third largest port in terms of container transport volume, and has a competitive edge in export, efficient customs clearance and transportation cost. “I’m still looking forward to fastener market development during this autumn and winter.” Dubbed as the grain for industries, fasteners are indispensable for all walks of life. Fastener demand will not cease even if the whole world is confronting the same unprecedented challenge. Furthermore, Jingle-Tech Fasteners is expanding its plant to increase product items and opt for high end and non-standard products. With a monthly capacity of 2,000 tons and an annual revenue at USD 15 million, Jingle-Tech Fasteners hopes to do bigger business after the expansion! □
