Born with the DNA of Industryleading Quality Chinmore 竣茂工業

The Manufacturer of Precision Industry Co., Ltd. **Electronics Hardware**

領先同業的品質DNA 精密電子五金零件產製

by Gang Hao Chang, Vice Editor-in-Chief of Fastener World

hinmore Industry Co., Ltd., specialized in automatic lathe manufacturing and design & processing of various precision electronics parts/plug parts/hardware parts/dies, has been offering excellent product quality and customized & highly efficient service to every customer for more than 2 decades. It has been also playing an indispensable supplier to the advanced application markets in Europe, USA, and Japan. The capacity to quickly accept domestic/overseas OEM and ODM orders, the team with a wide knowledge of professional engineering, state-of-the-art manufacturing and inspection equipment, fully quality management systems compliant SOP, and complete after sales service are all what made Chinmore successfully consolidate a firm presence on the global stage since its inception in 1997 as well as key factors for it to be chosen by customers (particularly in the telecom. market) to be the primary and reliable supplier.

Vertically Integrated Manufacturing Procedures / High Quality Control Starts from Material Selection

With the use of only conflict-free materials and the same requirements on its associate factories, Chinmore strictly complies with international quality management systems from material selection to inspection before shipment. Moreover, in order to achieve continuous quality improvement and optimize capacity efficiency, it has also introduced more than one automatic lathes with better precision from Japan as well as the most advanced processing machines, such as automatic/semi-automatic CNC lathes, automatic lathes, and plastic injection machines, to ensure the high precision level of every product shipped out from Chinmore.

To adapt to customers' demands from distinguished industry sectors, Chinmore also has a team of professional and well-experienced engineers to assist them in examining the feasibility of their product design and give advice prior to production that best suits customers' expectations. Through strict and

flexible manufacturing procedures and service, Chinmore has not only tapped into major advanced application markets in Europe, USA, and Japan with its products, but also has had the ability to create higher added value for its customers' products.

"The demands of customers we serve around the world usually differ a lot, however, with our continuously upgrading capacity, R&D of dies, and industry-leading advanced manufacturing equipment in place, customers can absolutely rest assured to place orders to the most professional service team of Chinmore," says President Tien-Din Wang.

Supply in Separate Batches to Reduce Inventory Cost for Customers / Being Certified to 4 Different Certifications

As a majority of customers of Chinmore are from the telecom industry, in which products are being replaced with new ones really fast, and its customers are always in urgent need of integrated product supply and require quick adaptability, Chinmore's ability to supply in separate batches to reduce customers' inventory and process orders for various products in small quantities exactly matches with customers' demands. Holding fast to the mission statement of "achieving the best quality in the world," Chinmore never ceases its progress in new product release and has been certified to CE, RoHS, ISO 9001:2015, and ISO 14001:2015. With capabilities for design, production, and export, Chinmore will still be cautious and conscientious in 2021 to provide global customers with the most reliable, durable and highest-quality products.
