

Manufacturers in the Lead

En Route for Innovation and Expansion

创新与扩展之路

In Foshan City, there stands a company that constantly pursues excellence - Foshan Nanhai Sailuk Rivet Co, Ltd. Since its establishment, Sailuk Rivet has been adhering to the corporate philosophy of "Quality as the Foundation and Innovation as the Soul", and has been steadily moving forward in the fierce market competition.

In line with its booming business, Sailuk Rivet has made a major strategic change by moving to new premises and significantly expanding its production scale. This move not only enhances the company's production capacity, but also marks a solid step forward in the manufacture of fasteners for the automotive and new energy industry sectors.

In the automotive field, the quality of fasteners is directly related to the safety and durability of the entire vehicle, and Sailuk Rivet understands this relation and has invested a great deal of resources in optimizing production processes and improving product quality. **Whether it is the fastening needs**

of the engine, the chassis, or the vehicle body, Sailuk Rivet can always provide products that meet the strictest standards.

Meanwhile, facing the transformation of the global energy structure, **Sailuk Rivet is actively involved in the new energy field and has developed a series of high-performance fasteners for new energy vehicles, solar panels, wind power generation and many other industries.** Through continuous R&D and technological breakthroughs, Sailuk Rivet is now becoming a reliable partner for the new energy industry.

As a company that values innovation, Sailuk Rivet has a team of technical professionals who are committed to new product development and improvements of existing products. The company also works closely with industry-leading R&D organizations to ensure that its technology and material applications remain at the forefront of the industry.

Looking into the future, Sailuk Rivet will continue to uphold the spirit of craftsmanship, adhere to technological innovation, and strive to become a first-class domestic and international supplier of fasteners. The new production base, advanced production equipment and continuous improvement of technical capabilities will help Sailuk Rivet go further on the road of specialization and internationalization. ▣
