

宏吉紧固，全球稳固！从永年出发，让世界看见可靠供应力

Hongji's Fasteners, Securing the World! From Yongnian to the World: Delivering Reliable Supply

Eastern European markets, it sees more than just new orders. It sees growing opportunities for long-term collaboration. Through multi-product integration, international standards expertise, flexible customization, mixed-container loading for multiple specifications, logistics coordination, and reliable quality and delivery performance, the company aims to reduce the costs and risks customers face when managing multiple suppliers.

Focusing on Central & Eastern Europe, Seeking the Next Long-Term Partner

From Stuttgart and Russia to Saudi Arabia, South Korea, Thailand, Vietnam, and Australia trade shows, the company continues to engage directly with international market frontlines to better understand what customers in different regions truly need. Its next stop will be FastTec (Russia), October 19–21, Booth E1. To Hongji, sourcing fasteners is not simply about purchasing products. It is about ensuring that the next shipment arrives when it is needed, meets the required quality standards, and is backed by a supplier willing to take responsibility when challenges arise. Looking ahead, the company will continue strengthening its development of high-strength, corrosion-resistant, anti-loosening, and customized fastening solutions. Through integrity, more transparent communication, and professional service, it is ready to work alongside customers across Central and Eastern Europe—and the world—to fasten the next stage of shared growth. ■

From “Product Supply” to “Integrated Solutions”

Since its establishment in 2012, Handan Yongnian Hongji Machinery Parts Co., Ltd. has leveraged the strengths of being located in Yongnian, Hebei—one of China's most important fastener industry clusters—to evolve from a traditional product supplier into a professional fastener partner integrating production coordination, quality control, product customization, export services, and supply chain resources. With an approximately 10,000-square-meter facility and a 40-people professional team, the company has obtained ISO 9001 and TÜV certifications, with its products reaching more than 30 countries worldwide.

One-Stop, Multi-product International Fastener Partner

From bolts, nuts, screws, and anchors to threaded rods, washers, rivets, castings, and a wide range of customized and special-shaped parts, the company can supply products in accordance with GB, DIN, ISO, EN, ANSI/ASME, ASTM, and JIS standards. It can also develop tailored solutions based on customer drawings, samples, and specific application environments. Diverse materials—including carbon steel, stainless steel, alloy steel, aluminum, copper, and nylon—combined with surface treatments such as hot-dip galvanizing and Dacromet, enable its products to serve applications across construction, machinery, railways, energy, mining, automotive, and medical equipment.

Fast Delivery, Stemming from Full-Process Management

For the company, the goal is not simply to manufacture the right products—it is to make sure that the products are up to par to be handed to customers. Quality control runs throughout the entire process, from requirement confirmation, technical review, first-article approval, in-process inspection, and performance testing to packaging, customs clearance, and international logistics. **Approximately 70% of the products can be shipped within 10 days, while around 80% can be delivered within 15 days. For non-standard products and special requirements, the company remains committed to providing realistic and achievable lead times.** In the Central and
