

Fastener Fair India 2026-

Make-in-India and Infrastructure Boom Create New Opportunities for Fastener Suppliers

2026 印度大诺伊达紧固件展 -
印度制造与基建热潮带动需求
紧固件迎来新商机

Fastener Fair India 2026 was held from July 24–26 at India Expo Mart in Greater Noida. As India's leading exhibition dedicated to fastener and fixing technologies, the event showcased industrial fasteners, construction fixing systems, manufacturing equipment, tooling, surface treatment, inspection solutions, and hand tools. Bringing together buyers from the fastener, automotive, construction, heavy industry, and infrastructure sectors, the exhibition once again served as one of South Asia's key sourcing and networking platforms for the fastener industry.

The three-day exhibition attracted strong visitor traffic throughout the event. Approximately 90% of visitors came from India, while the remainder represented the Middle East, China, Europe, and North America, indicating that the show continues to be primarily driven by domestic demand while gradually gaining greater international attention. Around 90% of exhibitors were Indian companies, with the remaining exhibitors coming from China, Taiwan, etc. Chinese exhibitors significantly outnumbered their counterparts. Roughly 80% of exhibitors were fastener manufacturers, while the rest represented wire, coating technologies, tooling, circlips, machinery, engineering software, and inspection equipment, reflecting the increasing maturity and specialization of India's fastener supply chain. We brought 3 Taiwanese fastener firms including Ray Fu Enterprise, Homn Reen Enterprise, and Sheng Qian to exhibit at this show.

On the demand side, buyers were mainly seeking self-drilling screws, drywall screws, machine screws, anchor nuts, and other construction and industrial fasteners. Some visitors also expressed interest in caulking guns and related construction tools. The demand closely mirrors India's ongoing investment in infrastructure and manufacturing. **Extensive roadworks, residential and commercial construction projects, together with the large number of aging buildings and vehicles observed throughout the city, suggest continued long-term demand for construction fasteners as well as automotive fastening solutions.**

As India continues to advance its "Make in India" initiative and expand infrastructure investment, demand for fasteners is expected to maintain steady growth. For companies looking to expand into South Asia, Fastener Fair India has become an important platform for identifying market trends, strengthening supply chain partnerships, and exploring new business opportunities. The organizer has announced that the next edition will be held in Mumbai on 22–24 April, 2027. ■
