Join the fastener and fixing industry's international gathering, as Fastener Fair Global is back for 2023 in Stuttgart

Fastener Fair Global 2023, the 9th International Exhibition for the Fastener and Fixing Industry, takes place from 21 – 23 March 2023 in halls 1, 3, 5 and 7 at Messe Stuttgart Exhibition Centre in Germany. The event is a meeting place for leading international organisations in the fastener and fixing sector and an opportunity for exchanging competencies and views on current technological developments.

Exhibitors at Fastener Fair Global present products and services from the following sectors:

- Fastener manufacturing technology
- Industrial fasteners and fixings
- Construction fixings
- Assembly and installation systems
- Storage, distribution, factory equipment
- Information, communication and services

Fastener Fair Global provides an excellent platform to establish new contacts and build successful business relationships between suppliers, manufacturers, distributors, engineers and other industry professionals from various production and manufacturing sectors looking for fastening technologies.

International firms representing the market

Some 835 companies have confirmed their participation at Fastener Fair Global 2023, covering 22,000 sqm of the exhibition ground. International firms from 42 countries are participating in the show, representing SMEs and large multinational enterprises mainly from Germany, Italy, China, Taiwan, India, Turkey, the Netherlands, the UK, Spain and France.

Ahead of the event, Liljana Goszdziewski, Portfolio Director for the European Fastener Fairs, comments: "After four years since the last edition, it is rewarding and exciting to be able to welcome the international fastener and fixing industry at Fastener Fair Global 2023. The high turnout of exhibiting companies confirmed at the event reflects how keen the sector is to get together face-to-face and participate in the show to allow plenty of business networking activities and enable new sales and learning opportunities in a fast-growing market."

A positive outlook of a growing sector

Fastener Fair Global provides a marketplace with a unique showcase and networking platform in one of the world's leading industrial economies. The global industrial fasteners market size was valued at USD 88.43 billion in 2021 and is predicted to expand at a compound annual growth rate (CAGR) of 4.5% from 2022 to 2030. The market is expected to be driven by population growth, high investment in the construction sector, and rising demand for industrial fasteners in the automotive and aerospace sectors. Moreover, the industrial machinery segment is set to expand at a CAGR of 5.0% from 2022 to 2030. The rapid growth of heavy machine-driven industries, including textiles, food and beverage, and chemicals, is expected to propel the demand for industrial machinery, thus driving the need for industrial fasteners over the forecast period.

Serving a wide variety of industries

Exhibitors will be aiming their products and services at many industries, including:

- Construction
- Automotive
- Aerospace
- Marine
- Electronic and Electrical Goods
- General Engineering - Light/Heavy
- HVAC / Air Conditioning / Services
- Energy and Power Generation
- Communication Technology
- Metal Products
- Furniture Manufacturing
- Sanitary Ware and Plumbing
- Installation

A high satisfaction level recorded by attendees

Over 12,000 senior managers, engineers and buyers visited the last edition of Fastener Fair Global. The mix of visitors to the show represented the diversity of markets served by the fastener and fixing industry. Most visitors were producers, wholesalers or distributors, playing a vital role in the supply chain to resellers and the manufacturing sector.

The vast majority of visitors at Fastener Fair Global achieved their business goals by attending the event, with 91% of visitors claiming to be highly satisfied with the show. As a result, 3 in 5 visitors would recommend Fastener Fair Global to their colleagues and business partners.

Fastener Fairs – connecting fastener professionals worldwide

Fastener Fair Global belongs to the highly successful worldwide series of Fastener Fair exhibitions for the fastener and fixings industry. These include the portfolio flagship event, Fastener Fair Global, as well as Fastener Fair Italy, Fastener Fair India, Fastener Fair Mexico and Fastener Fair USA.

For more information on Fastener Fair Global 2023, visit <https://www.fastenerfairglobal.com/>

FASTENER FAIR GLOBAL 2023

Pre-show Orientation for Taiwan Exhibitors Ends with Satisfying Feedback

After four years of postponement, Fastener Fair Global will finally be held on March 21-23, 2023. The organizer's exclusive agent in Taiwan, Fastener World Inc., is expected to form a large exhibiting group of more than 130 Taiwanese companies to participate in the Fair, which will further deepen the cooperation between Taiwanese fastener supply chains and the greater European market full of business opportunities.

In order to provide Taiwanese exhibitors with a more comprehensive understanding of the details that should be paid attention to before and during the Fair as well as the current situation of the European market before setting out to participate, the organizer's exclusive agent in Taiwan, Fastener World, held a pre-show orientation on January 11 (Wed.) at Evergreen Plaza Hotel (Tainan) and invited more than 100 exhibitor representatives to attend. TFTA Chairman Josh Chen and TIFI Executive Secretary Shih-Tsung Huang on behalf of TIFI Chairman Tu-Ching Tsai were also present to deliver their speeches.

Fastener World Magazine
President William Liao ▼

TFTA Chairman
Josh Chen ▼

TIFI Executive Secretary
Shih-Tsung Huang ▼

Fastener World Magazine President William Liao said in his opening speech, "I'd like to thank everyone for exhibiting at FF Global through Fastener World. Since the first edition of the Fair, its popularity and importance in the global fastener industry has been increasing year after year, and it is now the largest and most leading dedicated fastener fair in the world. Every past year, more than 100 Taiwanese exhibitors chose to exhibit through Fastener World. This show is also an important platform for Taiwanese exhibitors to develop the European market and strengthen their business deployment in Europe. We hope that through this pre-show orientation, our professional team can help exhibitors make adequate preshow preparations and seize the European fastener market, which is gradually recovering after the epidemic."

During the conference, the editors of Fastener World also briefed about the overall development trend of Taiwanese fasteners exported to the world over the past 20 years, important data and events of exporting to Europe and the United States, the dynamics of European target manufacturers and the recent concerns of European buyers, etc., which were presented in tables and charts. Vice Editor-in-Chief of Fastener World Magazine, Gang Hao Chang said, "In 2022, Taiwan's fastener exports reached 1,607,000 tons, almost the same as in 2021, and the export value reached US\$6.142 billion, a 15.47% increase compared to 2021. The competitiveness and performance of Taiwan is more impressive than that of other countries. These slides will not only let exhibitors understand the importance of Taiwan's fastener supply chain in the global industry and the expectation of its future development, but also will let them know the fact that the current overseas exhibitions have gradually returned to normal and that overseas buyers are looking forward to contacting Taiwanese suppliers at the Fair face to face and to discussing purchasing and further cooperation."

Many exhibitors also made their inquiries about the floorplan, exhibition permits and documents applications, stand furniture and extra rentals, product delivery, exhibition planning and itinerary...etc. Fastener World's staff were also present to provide detailed onsite explanations, which did help them a lot.

JC GRAND-

Excellent Fastener Manufacturing & Service Since 1978

**FASTENER
FAIR GLOBAL**

Hall 5, No.

2958

JC Grand is a leading manufacturer and exporter of industrial fasteners and metal hardware components. Since 1978, JC Grand has been serving customers globally with an extensive line of high quality screws, nuts, bolts, washers, anchors, and customized hardware products from its wholly-owned factories in Taiwan and China. All of its locations are ISO 9001 certified, and singularly focused on delivering products and services of exceptionally consistent quality to its clients

worldwide.

Certified Facilities and Full-Fledged Capabilities

The company consists of a main office in Taipei, three ISO-9001 and IATF-16949 certified production facilities in Kaohsiung, Taiwan, and an 800,000 square feet vertically-integrated factory in Zhejiang, China, all connected and managed by the same SAP ERP system. In addition, JC Grand owns and operates an A2LA certified (ISO-17025) mechanical testing laboratory in Kaohsiung. Technical staff and internal production covers fastener design, cold heading, self-drilling point forming, continuous line heat treatment (neutral, carburizing and carbo-nitriding), optical and roller sorting, washer assembly, custom packaging and logistics.

New Surface Coating Factory Opened

As of 2022, JC Grand has opened and is currently operating a new, surface coating factory in Kaohsiung focused on the prevention of fastener corrosion in severe outdoor environments. This facility has two principal workflows and equipment: the base coating cold welds, diffuses and seals proprietary multi-metal powders onto the fastener substrate, and the other applies thermoset organic topcoats and friction modifiers on top of the base coat via automated dip-spin lines.

It dispatches more than 300 containers (4500+ tons) of fasteners every month to over forty countries and employs more than 300 sales and factory personnel. It is equipped to produce both standard and customized fasteners that meet all industrial requirements.

Worldwide Service for Various Industrial Demands

Whether you are an industrial manufacturer, OEM or wholesale distributor, professional contractor supplier, or retail-focused operation, it understands your needs and has the experience and capability to consistently meet them. Its goal is to establish and maintain a long-term, mutually-beneficial relationship with its customers, and to provide a level of service that exceeds expectations.

MAO CHUAN INDUSTRIAL

Exhibits to Open Tier 1 Automotive Supply Chain Opportunities

**FASTENER
FAIR GLOBAL**

Hall 5, No.
2937

Experienced in European Tier 2 Automotive Supply Chain

A professional stamping parts manufacturer, Mao Chuan Industrial, is a qualified manufacturer of Tier 2 automotive supply chain, and is also an IATF 16949 and VDA 6.1 certified manufacturer. They have a wide range of products, including automotive metal domes, clips, cable ties, washers, caps, weld nuts for seat belts, compression limiters and various customized component products. All raw materials are from non-conflict mining countries and comply with EU RoHS and Reach regulations. The products meet the mechanical characteristics in automotive regulations in tests of insertion force, pull-out force, load, torque, and prevailing torque, and also meet the automotive surface treatment regulations in tests of coating thickness, salt spray, aging, and friction of coefficient. The company is a major brand with experience in European automotive supply chains.

After three years of travel restriction, they will appear again in Fastener Fair Global and are looking forward to working with existing customers and communicating the results of its sustainable development and digital transformation strategy to their customers to gain more new product development opportunities. With a long-standing, stable and high market share in Europe and an excellent reputation, they are actively exploring new customers to increase sales.

They export to Europe (50%), the Americas (33%), Asia (10%), South America (5%), and even Africa (2%). As an automotive Tier 2 supplier, its customers are mainly from the fuel and electric vehicle industries, including OEMs and the aftermarket. In addition to automotive products, they will exhibit products for household appliances, construction, electronics, and medical industries.

Actively Developing Tier 1 Automotive Customers

Their automatic stamping machines are networked and visualized to control the production line productivity in real time. They have also developed customized automatic assembly machines that combine AOI and automatic packaging lines to improve production efficiency and yield through "smart" manufacturing. The entire internal process follows ISO/IATF/VDA quality management standards, and the external process is in line with ISO/IATF/CQI heat treatment and electroplating manufacturers' PPM requirements.

For European automotive and related industries, the most eye-catching feature is that Mao Chuan Industrial has the ability to interface with automotive Tier 1 customers with digital applications, including WEB EDI - (RFQ, PO, material release, planning schedule, advance

shipping notice, packing list, INV). In 2023, They will actively attend global fastener exhibitions and expect to successfully develop more Tier 1 automotive customers.

Focused on Carbon Reduction and Labor Force Trends

To be a sustainable business and meet the international trend of ESG initiatives and automotive industry chain requirements, the company has completed 80% of its greenhouse gas inventory and expects to conduct an ISO 14064 audit in June 2023. They will pass ISO 14067 product carbon footprint certification by 2025 and become a green company. In addition, they are concerned about labor issues. According to a study, the global labor force will drop to 42% by 2030. In recent years, the global industry supply chain has been changing rapidly, and the demand for labor has increased greatly, but the problem of labor shortage is serious. Finding ways to solve labor shortage and quality problems is the most important task to maintain the competitiveness of enterprises.

J. T. FASTENERS SUPPLY

Seeks Opportunities for Customized Products with Europe

PPAP and 25 ppm Quality Guarantee

A renowned Taiwanese fastener manufacturer, supplier and exporter, J. T. has over 25 years of experience in hardware components and fasteners, continuing to upgrade products to meet international standards. They provide automotive rivet nuts, stamped parts and customized fasteners. “We have a quality lab and optical sorting machines to guarantee meeting PPAP requirements and 25 ppm quality. After optical sorting, our products go straight to our packaging machines which eliminates mixing up materials to meet automotive requirements. We build one-stop shopping service to meet customers’ diverse needs and simplify the procurement process. By cooperating with us, save the time and cost,” said J. T.

High Interest in Central and Eastern European Customers

J. T. deploys sales across the whole world. The largest proportion goes to the U.S. and Europe and Europe represents 30% of total sales. “We are strongly inclined to expanding potential clients in central and eastern Europe. We see fasteners as the largest market in automotive and there is an increasing demand for these fasteners. That’s what draws us to Europe. We’re also excited to work with industry-leading German companies, the information and technical knowledge are the latest topics,” said J. T. They have acquired ISO9001:2015 and D-U-N-S certificates and are in preparations for TS16949 certification. We set the target clients and hope to tap into the Tier-1 supply chain through them and build a close relationship at fastener shows anywhere around the world.

Discuss Design and Produce Satisfactory Products with Customers

They had met a client asking for a change in product design for improved functionality. J. T. evaluated the request and found problems that could lead to a flawed product, which was brought into discussion with the client and they came up with a new product drawing that solved the problems. In another case, an automotive client provided a drawing that was much different from the samples made by the original supplier. They figured out a way to make both ways work in the final drawing and the client was happy to go for a long-term relationship with them.

Contact for European market: Sales rep. Jimmy / Eunice
Email: Jimmy@jtfasteners.com.tw / Eunice@jtfasteners.com.tw

About the Vision and Arrangement for European Market

Given the world’s manufacturing having stricken by the virus, Russia/ Ukraine war and inflation, J. T. doesn’t quite see a vibrant market environment coming back anytime soon, but they do hope to see purchase orders keep coming. “Taiwanese fasteners are shifting towards high-end products for automobiles, aerospace and medical industries. Entering these industries is a greater challenge but once the clients have chosen you, they become your loyal partners.”

Next Step of the Way: Plant Expansion and New Equipment

With roots in Taiwan, J. T. utilizes the competitive edge of Taiwan-quality and reputation. They have observed many automakers roll out new designs tailored to global awareness in environment protection and air pollution prevention. For that reason, they are looking to expand reach in Europe in 2023 and develop customized automotive fasteners with clients. On top of that is their plan to expand their plant and add new equipment to allow for more business opportunities.

SPRING LAKE ENTERPRISE

Truly Understanding the Needs of European Customers

**FASTENER
FAIR GLOBAL**
Hall 5, No.
2578

Manufacturing and Trading Specialties

Providing a Full Range of Services to Europe

Spring Lake started as a professional trader in Pingtung, the southernmost part of Taiwan, more than 40 years ago. Over the years, they have accumulated much experience in international trade and have attracted many loyal customers for long term collaboration, from which they have possessed the know-how of fastener production and successfully transformed into a professional fastener manufacturer specialized in export. Their background has given them the ability to cope with various special requirements of European and American

customers. They listen and can catch the needs of customers, provide solutions merged with the perspective of the whole industry chain, and work with customers to develop satisfactory customized products. Comprehensive professional advice, as well as the mindset to put quality and service first, are the features that have helped them build a reputation.

Seeking C Parts Buyers in Exhibitions

The company mainly produces customized fasteners, screws in sizes above M2, SEM screws, knurled pins, thread rolling screws for plastics, bolts, rivets, weld nuts, and washers. Their products are mainly sold to Germany and the United States, and the sales to UK, Japan, France, India, Italy and South Africa are gradually increasing. As trade shows around the world are becoming more and more popular, they expect to meet and collaborate with customers in the automotive, construction, electronics, furniture, and solar industries by attending the shows, and increase their overseas exposure. Currently they are particularly looking for global potential clients with C-Parts needs.

Catering to EV Demand for "Cleanliness"

The quality requirements for fastening products in the EU are not only strict but also constantly updated. In recent years, the European VDA standard has been updated to require the cleanliness of fasteners and other parts. This is due to the fact that high-end precision products such as electric vehicles are not tolerant to dust or contaminants such as mixed materials causing operational failure.

Spring Lake has been working in the field of automotive fasteners for nearly 20 years and is ISO 9001 certified. In response to the new demand trend in Europe, they quickly started to conduct research on cleanliness requirements and can provide fastener products with the cleanliness level for European customers.

Developing a New Market: Bike Fasteners

The company said that, even if situations are not yet clear after the pandemic, they found that the number of orders for bike-related fasteners has increased significantly. In light of this, they have purchased new machines to meet the demand of global customers in this area. They will continue to further develop the bike fastener market in the future.

Regardless of drastic changes in the past two years, they are always aware of the global political and economic changes and are always prepared for them. In the European market, they will continue to break new ground with consistent quality products, speedy delivery and, most importantly, the ability to respond to the changing customer needs.

Contact: Daniel Chen Email: daniel@springlake.com.tw

One of Taiwan's Top 10, JAU YEOU INDUSTRY Expands Sales in Europe

A major manufacturer of low carbon steel small screws, Jau Yeou has also been listed among the top ten screw companies in Taiwan for several times. The revenue in 2021 grew 20.5% to NT\$3.3 billion, of which Europe already accounts for 60%. With this growth momentum and the reopening of the market, they are expanding sales in Europe in 2023, and their critical stop is Fastener Fair Global (Stuttgart). This is the largest fastener exhibition they have participated in since the travel restrictions in 2020. They want to discover new potential customers in Europe with stable quality and delivery, as well as product customization services.

Looking for Construction and Automotive Fastener Buyers

They will exhibit construction and automotive fasteners at the Stuttgart show. In addition to promoting long screws and drywall screws, they will also include welding screws. At least 15 types have been developed and mass-produced. Due to mastering the forming technology of solder joints (rings), they have good quality. Furthermore, they revealed to Fastener World that their composite screws are being developed and prototypes have been successfully made. They also purchased many machines to meet the demand for collated screws. In automotive fasteners, the main focus is on interior parts and welding screws. "Most of our interior parts are small screws, such as thread forming screws, tapping screws, and trilobular thread screws, which are in line with our construction parts expertise in which we have experience for more than 40 years. The source of materials is Taiwan CSC, and the quality is stable," said the company.

The company has always been adhering to the principle of "Doing it right the first time, ensuring quality and improving efficiency", responding to the requirements of European industrial, automotive and high-end industries. They have technical personnel education and training, and through double supervision to meet customer needs.

Positive Prospect for JYR Aviation Components

According to Jau Yeou, since the fourth quarter of 2021, clients' demand for the products of their subsidiary JYR Aviation Components has increased, bringing a turnover in 2022 up 105% from 2021, and has recovered up to 90% of the 2019 level. At present, it seems that the demand of international aerospace industry continues to grow. Due to global supply chain issues,

as well as labor shortages, lack of production capacity, and loss of technical personnel, major international manufacturers such as Boeing and Airbus predict that the problem will not be alleviated until the second quarter of 2023. The war between Russia and Ukraine has caused soaring prices of raw materials and prolonged lead time. Although it has affected the aerospace industry, the prospect is still promising.

Key Words: Capacity Expansion & Carbon Reduction Certification

After the shipping congestion in 2020 and the subsequent overwhelming orders, Jau Yeou has experienced tight production capacity and inventory. In order to increase customer satisfaction and ensure stable delivery, they will expand their capacity and warehouse space in the future. The top two markets of Jau Yeou are Europe and America. Since Europe will start the carbon footprint audit process in 2023, and the United States will start the same process as soon as 2024, Jau Yeou is working with the government to obtain relevant certification as soon as possible in accordance with the needs of customers.

They observed from Poland and Italy shows that the momentum of the fastener industry's recovery after the pandemic should not be underestimated. In addition to the developed Western European market, the post-Brexit UK, Eastern Europe with rapid industrial development and countries that have experienced post-war conflicts are all potential markets. □

FASTENER
WORLD
www.fastener-world.com

 **Stand: 2831, Hall 5**

After 3 years of postponement since the outbreak of Covid, the world's leading and largest fastener trade event, Fastener Fair Global, held in Stuttgart, Germany has now returned and will be held live in March 2023. Taiwanese exhibitors will again become one of the largest foreign exhibitors groups. In order to make you preview what these exhibitors are going to present at the Fair, below are a list of all Taiwanese exhibitors represented by the organizer's exclusive sales agent in Taiwan, Fastener World, which include the brief introduction of these high quality suppliers.

2023 Fastener Fair Global Taiwan Exhibitors

AIMREACH ENTERPRISES CO., LTD.

Description

Aimreach was established in 1993, by the moving on of time, we invested in different factories to get our orders done in Taiwan mainly for Self drilling screw, Self tapping screws, Drywall screws. Afterwards, in 2016, we further step into the field of Bi-metal screw and packing factory, up to 2022, we have our own mill for ultimate quality of drywall screw. Besides, we keep sourcing for various products to fulfill all kinds of demand for our valuable customers.
