Started as a tool parts manufacturer with rich experience and technology in the field of parts processing, Tung Fang Accuracy Co., Ltd. (TFA) is a professional manufacturer that provides a wide range of high-quality punches, tungsten steel dies, and machine parts tools for the fastener industry both domestically and internationally. Since its inception in 1995, the company has not only continued to develop the technology and design of punches & dies, but has also met the needs of customers all over the world with excellent and durable products and innovative customized services. With the team's efforts in expanding the international market over the past 30 years, the company has successfully entered the European and Asian markets such as Germany, Italy, Japan, Turkey and India. This year, it also participated in the Wire Düsseldorf in Germany, hoping to gain more cooperation opportunities in Europe and other important demand markets.

Having successfully obtained the ISO 9001:2015 certification, TFA mainly offers Torx punches, dodecagonal punches, hexagonal punches, tungsten steel punches, non-standard punches, tungsten steel screw dies and screw dies, which can be 100% customized according to customer's drawing requirements. These products play an integral role in helping their customers maintain superior quality and enhance performance in real-world applications, and have been the key to many fastener suppliers upgrading from standard parts manufacturing to mid-range and high-end products manufacturing. TFA insists on **using high speed steel, ASP powder-metallurgical steel, tungsten steel, and steel by Austrian Bohler as raw materials, which are used in conjunction with the coating to greatly increase the service life of products.** In terms of manufacturing process, it has also **introduced various automated machines and equipment,** and

optimized and upgraded the hardware equipment to create a fully automated process that can produce durable and precise punches & dies in a fast manner.

“As a professional supplier of integrated punches & dies, we’ve always believed in the importance of creating a win-win situation and sustainable business, and at the same time, we also uphold the concept of continuous R&D, striving for excellence, and continue to provide excellent technology, quality, design and service standards to win the trust of our customers,” TFA says.

In recent years, TFA has been actively expanding into the international market, deepening the connection with the direct users of its products, and strengthening its ability to provide more complete customized services to meet the needs of mid-range and high-end market customers. By adopting TFA's punches & dies, users can achieve more efficient connections at all stages of the production process, and will not have any subsequent customer complaints or production line interruptions due to the use of poor-quality punches & dies.

“We continue to be on the front line in solving the problems encountered by our customers in processing their products, and at the same time, we focus on providing the best product solutions for our customers to enhance their competitiveness. We look forward to working with more domestic and international customers in the future to enhance the brand value of their products and gain more orders,” TFA says. ■
