

# Taiwan-made High Quality Precision Springs Exported to the U.S., Europe, Japan **Sheng Chi Spring Co., Ltd.**

外銷歐美日的台製高質精密彈簧 聖綺彈簧五金有限公司

Located in Lugang Town of Changhua County (central Taiwan), Sheng Chi Spring has over 30 years of experience in specialized production of compression springs, extension springs, torsion springs, flat springs, etc. Its predecessor is Ruifeng Spring Manufactory established by the founder with 165 square meters of floor area and 3 employees. In 1998, Ruifeng Spring Manufactory was renamed to Sheng Chi Spring Manufactory, and then in 2010 renamed again to Sheng Chi Spring Co Ltd as we know it now. The current number of employees in Sheng Chi Spring has increased to 15. In 2013, the company expanded the manufacturing plant to a floor area of 992 square meters. Today, the company is a reputable spring expert in the local county and central Taiwan.

## Assorted Sizes & Materials Available in Standard and Customized Formats

Sheng Chi Spring produces springs and flat springs made of various types of wires and plates. Besides standard products, the company can provide customized springs according to clients' needs to help them produce

desired products with maximized efficiency. Regarding the sizes and materials available from Sheng Chi Spring, Eric Hsu, successor to the founder, said the company produces springs in sizes of 0.2mm-16mm. To cope with clients' demand for various materials, the company uses SWC, SWOSC-VSWOSC-B, SUP, SUS304 and other materials used for manufacturing springs. Such production flexibility makes Sheng Chi springs extensively applicable to hand tools (SAE-9254, SWOSC-V, SUS304 ratchet wrenches), pneumatic tools, precision electronics parts, medical equipment, electrical switches, optical instruments, motor parts, etc.

## Precise Production & Quality Check

Not only does the company has spring formers and grinders to produce springs in clients' desired specifications, but it also has pressure resistance testers and tension/compression/load testers to monitor product quality. Sheng Chi Spring can produce products

in accurate sizes demanded by clients according to their drawings. Before shipment, the company's QC personnel will use testers to inspect products with reference to the drawings, and ensure that the products meet required specifications and clients' desired quality.

## Exporting to the U.S., Europe, Japan & Keeping an Eye on the Global Spring Market

Eric said that springs are required by all sorts of professional tools and repair equipment. "If there is any part in the world that needs us, that is where our springs will go to. We can precisely produce and offer springs specified by clients." Sheng Chi springs are marketed through trading and sold to the U.S., Europe and Japan. To keep up with the advancement of technology, Eric revealed that the company plans to add advanced equipment in the future to offer clients better production service! ▣
